Description of Damage to Aircraft and Other Property (Use additional sheet if necessary)

Aircraft N54MC has extensive Fire damage near firewall on Right side. Fire did make its way into cockpit near Rudder Peddles.

NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

5/6/21

4:00pm Local Time at KDWH airport

N54MC departed KDWH VFR to the West for some Airwork on an Instruction flight just outside the Bravo airspace.

At around 4:30 local N54MC entered KDWH airspace for work in the traffic pattern. After the 3rd Lap around we came and landed with the intent of going back, the The Flight School.

After touchdown we started slowing down to exit the runway. As soon as we started slowing down, the engine shutdown. But we still had momentum to exit runway 35L on taxiway E. We exited the runway and came to a full stop and advised tower that our engine quit after landing and that we were going to attempt the restart.

During the restart, I was handling the restart due to the student being at low time and low experience. I treated the restart like a normal restart at first, but after the engine would not start, I attempted the vapor lock starting procedure. The engine started to begin to start like normal and that is when I introduced fuel. Once I moved the mixture to rich, the aircraft cabin got extremely hot, and we began to see the flames.

In that moment, the student and I began evacuating the aircraft due to the smoke entering the cabin and the extreme heat we felt.

After evacuating we got a safe distance from the aircraft and I called The Flight School to get some help. I didn't have the number for tower, and I knew that The Flight School could get ahold of tower extremely fast since they have handheld radios.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

The Aircraft Still needs to be examined to determine what could have prevented this.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)Was there Mechanical Malfunction/Failure? ☐ Yes ☐ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)

Unknown. Need mechanics to have permission to inspect Aircraft
