

NATIONAL TRANSPORTATION SAFETY BOARD PILOT/OPERATOR AIRCRAFT ACCIDENT/INCIDENT REPORT

This form to be used for reporting civil and public aircraft accidents and incidents

BASIC INFORMATION

Accident/Incident Location

Nearest City/Place: Tulsa State: OK

ZIP: 74055 Country: USA

Latitude: 36.1988 N Longitude: 95.8839 W

(Enter in decimal degrees or degrees minutes seconds)

Accident/Incident Date/Time

Date: 05/13/2021 Local Time: 1:45 am
mm/dd/yyyy

Time Zone: Central

Collision with Other Aircraft: ☐ Midair ☒ On-ground ☐ None

AIRCRAFT INFORMATION

Registration Number: N8051B

Manufacturer: Cessna

Model: R182

Serial Number: R18201574

Year of Manufacture: 1980

Amateur-Built: ☐ Yes ☒ No If Yes ☐ Kit/Plans ☐ Original Design Make: _____

☒ IFR-Equipped and Certified

☐ Commercial Space Flight

☐ Unmanned Aircraft

Maximum Gross Weight: 3100 lbs

Weight at Time of Accident/Incident: 2250 lbs

Number of Seats: 4 Flight Crew Seats: 1

Cabin Crew Seats: 0 Passenger Seats: 3

Number of Engines: 1

Category of Aircraft

- ☒ Airplane
☐ Balloon
☐ Blimp/Dirigible
☐ Glider
☐ Gyroplane
☐ Helicopter
☐ Powered Lift
☐ Rocket
☐ Ultralight
☐ Unknown

Type of Airworthiness Certificate

(Check all that apply)

Standard

- ☒ Normal
☐ Aerobatic
☐ Balloon
☐ Commuter
☐ Transport
☐ Utility

Special

- ☐ Restricted
☐ Limited
☐ Provisional
☐ Special Flight
☐ Experimental
☐ Special Light-Sport
☐ Experimental Light-Sport

☐ Certificate of Authorization or Waiver (COA)
☐ None ☐ Unknown

Landing Gear

(Check all that apply)

☒ Retractable

- ☒ Tricycle ☐ Tailwheel
☐ Amphibian ☐ High Skid
☐ Emergency Float ☐ Skid
☐ Float ☐ Ski
☐ Hull ☐ Ski/Wheel
☐ Other Launch/Recovery System
☐ None ☐ Unknown

Engine Type (Select one)

- ☒ Reciprocating ☐ Liquid Rocket
☐ Turbo Shaft ☐ Solid Rocket
☐ Turbo Prop ☐ Hybrid Rocket
☐ Turbo Jet ☐ None
☐ Turbo Fan ☐ Unknown
☐ Electric

Fuel System Type (Reciprocating)

☒ Carburetor ☐ Fuel-Injected

Engine	Engine Manufacturer	Engine Model/Serial	Manufacturer's Serial Number	Date of Mfg. mm/dd/yyyy	Rated Power ☒ Horsepower or ☐ lbs of Thrust	Total Time (hours)	Time Since: Inspection (hours)	Overhaul (hours)
Eng 1	<u>Lycom ng</u>	<u>O-540-J3C5D</u>	<u>RL-25588-40E</u>	<u>05/22/2018</u>	<u>235</u>	<u>375</u>	<u>1</u>	<u>375</u>
Eng 2

Eng 4								

Last Inspection Type

- ☐ 100-Hour ☐ Continuous Airworthiness
☐ AAIP ☐ Conditional Inspection
☒ Annual ☐ Unknown

Date Last Inspection: 05/11/2021
mm/dd/yyyy

Airframe Total Time: 4384.6 hrs

hours measured at (Select one)

☒ Last Inspection ☐ Time of Accident/Incident

Type of Maintenance Program (Select one)

- ☒ Annual
☐ Conditional (Amateur-built only)
☐ Manufacturer's Inspection Program
☐ Other Approved Inspection Program (AAIP)
☐ Continuous Airworthiness
☐ Other, specify: _____

Description of Fire Extinguishing System

- ☐ None
☒ Specify: HELO Fire extinguisher

Propeller 1

- ☐ Fixed Pitch
☒ Controllable Pitch
☐ Ground Adjustable

Manufacturer: McCauley

Model: B2D34C218

Propeller 2

- ☐ Fixed Pitch
☐ Controllable Pitch
☐ Ground Adjustable

Manufacturer: _____

Model: _____

ELT Installed: ☒ Yes ☐ No

If Yes

ELT Manufacturer: IAW Artex ELT

Model or Part No.: ELT 345

TSO No.: ☐ OC91 (121.5 MHz) ☐ OC91a (121.5 MHz)
☐ OC126 (406 MHz)

Was ELT still mounted in aircraft? ☒ Yes ☐ No

Was ELT still connected to antenna? ☒ Yes ☐ No

Did ELT Activate? ☐ Yes ☒ No

If activated

Did ELT Aid in Locating Aircraft? ☐ Yes ☒ No

If not activated

- Indicate Reason: ☐ Impact Damage
☐ Fire Damage
☐ Battery Expired/Damaged
☒ Unknown

Additional Equipment (Check all that apply)

- ☒ ADS-B
☐ Airframe Parachute
☐ Angle of Attack Indicator
☒ Autopilot
☒ Data Recorder
☒ Electronic Flight Bag or Handheld Device
☒ Electronic Multifunction Display
☒ Electronic Primary Flight Display
☐ Handheld GPS
☐ Heads Up Display
☐ Onboard Weather
☐ Satellite Tracking Device
☒ Stall Warning System
☐ Video Recording Device
☐ Other, Specify: _____

OWNER/OPERATOR INFORMATION**Registered Aircraft Owner**Name: James Truett Bryant, Jr.City: PryorFractional Ownership Aircraft: ☐ Yes ☒ NoState: OK ZIP: 74361Country: USA**Operator of Aircraft**☒ Same As Registered Owner☒ Same Address as Registered Owner

Road rash on wing tip

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

N8051B went into Annual inspection at the end of April. This was performed by my mechanic Eric Dowd at my hangar in Claremore. As per instruction, Eric performed the annual including a successful swinging of the landing gear. He had just finished his work on Wednesday, May 12.

I had a 6-hour flight planned for Thursday, May 13. I had two people who would be going a trip to Georgetown, Texas, with me. I've always felt the first flight following any annual or work performed by a mechanic MUST be done without passengers. So Wednesday night at 9:30 pm I went on a post-annual maintenance flight to check if everything was good for the next day's flight. The tanks were both full - 88 gallons of fuel onboard.

Everything appeared normal per my preflight and run up checklists. As I lifted from the ground, I also raised my gear which is extremely typical for me. If something is not working, I want to know as soon as possible. I noticed that the amber light (indicating the gear was fully retracted) did not light up. So I pressed the amber light to make sure it was functioning. Then it lit up showing it was working. I also did the same test with my green light (which indicates when the gear is down and locked for landing). The green light lit showing it was working.

So I moved my gear lever to the down position and the green light did not light up. I looked out the window and confirmed that the main gear was not in a down and locked position. In fact I couldn't see the main gear at all.

Next I pulled the gear breakers to the off position. Then I moved the gear lever to the down position and started vigorously pumping the emergency gear pump handle. I have done this procedure on a regular basis to make sure everything is working correctly. That way I'm familiar with how it feels when it's needed in an emergency. As I pumped the handle, there was no resistance to my pumping. And of course the gear did not extend.

While in flight, I called my mechanic and let him know of the situation. He and I walked through the possible repair and landing scenarios. After I hung up, I called Tulsa Approach and told them of the situation. I let them know I was not yet declaring an emergency but it could potentially escalate to that point. They gave me a squawk code and watched out for traffic in my area while I was working. I put the plane on Autopilot with the heading and altitude selected (2,500 feet). Then I proceeded to the luggage area to retrieve my tools and oil. I always carry two quarts of oil for emergency needs. I also had a quart bottle of Febreze that I brought to the front seat.

Then I moved the front seats all the way aft and sat down in the floor and proceeded to get the oil into my power pack (Cessna gear motor). I have an oil filler spout that has an attachment which is exactly the size needed to fit inside the filler hole of the power pack. I started to fill the power pack reservoir. When I got the first quart of oil in and closed the power pack filler hole, I started the emergency gear extension procedure. It did not work. It felt like before - no resistance and no movement of the gear.

So I got back on the floor and checked the level of the fluid in the power pack. Nothing registered on the dipstick after the first quart. So I poured the 2nd quart of oil in. Again nothing registered on the dipstick. I tried the emergency extension procedure but was not surprised by it not working again.

Finally I used the last liquid I had available (the Febreze) hoping for better results. But it was just as before.

At this point, I informed Tulsa approach (who had been monitoring my movement through their airspace during these attempts to repair the landing gear) of my intentions. We determined that runway 36L would be the better choice for a gear up emergency landing. I pulled out my POH and looked for the procedure and rehearsed it several times. (continued below)

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

It could not have been prevented because the gear would not go down and lock.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)Was there Mechanical Malfunction/Failure? ☒ Yes ☐ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)

The gear would not extend by using the electronic method (gear switch) or the manual extension method. The probable cause is yet to be determined.

continued from above...

I also decided to wait to land until I had less than 20 gallons total remaining in my tanks. I wanted to minimize the weight of the landing and reduce the chance of starting a fire with too much fuel leaking out.

So I flew around Tulsa for about 3 1/2 hours. Then I made the call to Tulsa approach and let them know about 30 minutes before that I was ready to land. They got the fire crew in position and informed me when they were ready for my arrival.

I rehearsed my landing gear up emergency procedure a couple more times. Then I secured all items in the cockpit. Began the checklist for landing and entered a left downwind for 36L. Add 10 degrees of flaps...latched the doors opened...turned left base for 36L...20 degrees of flaps...turned final for 36L...40 degrees of flaps...slightly high on approach altitude...pulled the fuel mixture at 300 feet above the runway 1,000 feet away from the end of the runway and the engine stopped soon after...touched down at the end of the runway slightly tail low...skid to a stop in 500 feet.

When I touched down, I realized that my front wheel was locked in a landing position. That one fact kept my plane from being damaged as badly as it could have been. The only parts of my plane that were damaged were the front wheel, the tail cone, the passenger side stabilizer, the elevator and the trim tab. Upon looking at it during the daylight hours the next day it was very hopeful that repairs will likely take place on the plane so it can return to service. In fact, the FAA Tulsa area representative looked at the plane and was amazed at the minimal damage that occurred. He said it was a text book landing executed flawlessly.

No damage happened at KTUL from my landing. The plane was carefully transported by wrecker truck down the runway to the Sparks FBO. It will sit there until it is picked up for repair. Our next plan is to jack the plane up and get it on all three of the gear. That way it will continue to be in the best position for a full restoration.

I experienced no bodily injury. While I was confident of a positive outcome, I was tense for the entire flight. That definitely fatigued my body the day after. I will go to work tomorrow and resume my typical schedule.

In the process of making decisions about how to repair the issue while flying the plane, I called my mechanic (Eric Dowd) several times. I also called a fellow pilot (Larry Lees) and my former CFI (Joe Bacon) for their opinions and help in resolving the issue. They called the Cessna Technical help hotline. We were informed that we had done everything they could see to resolve this issue.

I then turned my attention to emergency landing. I called the manager of my home airport (Eric Winn) and we worked through the option of landing there. Because there were no emergency vehicles available, we determined it was not the best option. So I spoke with Tulsa approach and determined it would be the safest option to land there with the fire equipment at the ready to assist if needed.

My training, cool head, using my available resources, experience and my faith in God are what I credit for this safe outcome. I'm ready to start flying as soon as possible.

Jim Bryant, Jr.
