I was flying back to KFCY, out of nowhere my power went to idle. While I went through my checklist while determining a place to land. I could not get the power to the plane and was forced to land in a field. I did not land into the wind because obstacles and the rows were against me. I rode it out for several feet, had a small bounce, then the airplane nosed over and flipped. I was able to walk away without any injuries.

Note: Altitude 1000 feet. I could hear the engine running.
