Description of Damage to Aircraft and Other Property (Use additional sheet if necessary)

NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

At approximately 2:00 PM, July 19, the aircraft sustained damage immediately following takeoff when the engine/propeller lost thrust. This was the 6th takeoff of the day after the morning engine start at 6:30 AM.

The aircraft was refueled (110 gal) and loaded (420 gal) immediately prior to the takeoff.

The pre-takeoff engine indications and control surface check were normal. Upon advancing the fuel condition lever to flight idle, the gas generator speed reached 98.6%. The power lever was advanced to reach maximum allowable torque (60 PSI). The aircraft accelerated normally and a soft-field takeoff was performed. The aircraft rotated at 65 MPH and lifted into ground effect after using about 1800 ft of runway. The aircraft accelerated normally in ground effect to approximately 78 MPH, when thrust was lost and the aircraft quickly settled into the corn field approximately 300ft from the departure end of the runway.
