

NATIONAL TRANSPORTATION SAFETY BOARD PILOT/OPERATOR AIRCRAFT ACCIDENT/INCIDENT REPORT

This form to be used for reporting civil and public aircraft accidents and incidents

BASIC INFORMATION

Accident/Incident Location

Nearest City/Place: Rock Falls State: IL
 ZIP: 61071 Country: USA
 Latitude: 46.7359110 Longitude: -89.6819145
 (Enter in decimal degrees or degrees:minutes:seconds)

Accident/Incident Date/Time

Date: 07/24/2021 Local Time: 6:30 pm
 mm/dd/yyyy Time Zone: Central

Collision with Other Aircraft: ☐ Midair ☐ On-ground ☒ None

AIRCRAFT INFORMATION

Registration Number: N7893F

Manufacturer: Cessna

Model: 150

Serial Number: _____

Year of Manufacture: 1966

Amateur-Built: ☒ Yes ☐ No If Yes: ☐ Kit/Plans ☐ Make: _____
☐ Original Design

☐ IFR-Equipped and Certified
☐ Commercial Space Flight
☐ Unmanned Aircraft

Maximum Gross Weight: 1600 lbs

Weight at Time of Accident/Incident: 1600 lbs

Number of Seats: 2 Flight Crew Seats: _____

Cabin Crew Seats: _____ Passenger Seats: _____

Number of Engines: 1

Category of Aircraft

- ☒ Airplane
- ☐ Balloon
- ☐ Blimp/Drigible

ELT Installed: ☒ Yes ☐ No

If Yes:
 ELT Manufacturer: _____
 Model or Part No.: _____
 TSO No.: ☐ OC91 (121.5 MHz) ☐ OC91a (121.5 MHz)
☐ OC126 (406 MHz)

Was ELT still mounted in aircraft? ☒ Yes ☐ No

Was ELT still connected to antenna? ☒ Yes ☐ No

Did ELT Activate? ☒ Yes ☐ No

If activated:

Did ELT Aid in Locating Aircraft: ☐ Yes ☒ No

If not activated:

- Indicate Reason: ☐ Impact Damage
☐ Fire Damage
☐ Battery Expired/Damaged
☐ Unknown

Additional Equipment (Check all that apply)

- ☒ ADS-B
- ☐ Airframe Parachute
- ☐ Angle of Attack Indicator

Description of Damage to Aircraft and Other Property (Use additional sheet if necessary)

aircraft nose wheel torn off, engine mount bent/broken, belly skin torn and wrinkled. Engine cowl torn and damaged on bottom, Lead edge on left wing dented in two places. Carburetor broken. Corn field we landed in 30x60 pushed down.

NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

After aircraft ~~was~~ tied was removed it was pulled on closed runway. Aircraft was hand propped. All systems good. Taxied to runway 25. Run up complete and good. Departed on paved runway 25. Turned left crosswind and downwind. On downwind Dan Gryder asked to control the aircraft. I said your plane and he said my plane. He turned left base and lined up to a temporary runway. Asked if I had ever landed in grass. "I said yes." He said we are not landing. On final Dan applied carb heat and flaps. I pointed out the flap indicator as he was applying the flaps. He ran flaps all the way to 40 degrees. My guess is the flaps were only in 40 degrees for about 10 seconds when he said I've seen all I've wanted to see. He pushed throttle full in and removed carb heat. Immediately reaching for flaps he started looking at the flaps and back at the electric flap switch. He stated after a few seconds "what's wrong with the flap." I quickly reached for the switch and tried it myself while Dan turned south in a slow turn. After attempting to work the switch I tried the master with ~~not~~ luck. Dan stated we are not going to make it back like this. I continued to try the switch until we were only about 25 ft above the ground. At that point I switched fuel off and turned master off. I popped my door open and checked our seatbelts. Within seconds you could feel the corn hitting the landing gear while the stall horn was screaming very loudly. About the time the aircraft was about to stop it flipped up side down. Immediately after coming to stop Dan shouts let's get out quickly. We waited in the downed corn until emergency crews arrived.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

not use full flaps for a approach that you don't intend to land

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)Was there Mechanical Malfunction/Failure? ☒ Yes ☐ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)

Electric Flaps. No sure how to calculate total time used on flaps, Flaps are checked on preflight and was used on the previous flight during landing.

After most of the airshow activities had begun to rap up, I tended to my aircraft, which was tied down along the N/S closed runway. Everything seemed good as this was going to be the last time I would see it until the following day. I headed to the main entrance of the FBO to wait for a shuttle. With no bus showing up I decided to wait inside. Inside was what looked like a post briefing for the STOL pilots. After a few minutes it was over and everybody left except Dan Gryder. He looked up eventually and asked if I needed help. Which spark a conversation between us. Oddly surprised because the first time I met Dan he was rude to me. I tend to brag how nice of a little Cessna 150 I have which led to Dan asking to see it. We went outside to see it which led to us agreeing to go for a ride. After checking it out and untying it we pulled it onto the closed runway facing South. We hopped in getting ready to go upon start up it would start under its own power. I asked Dan to hold the brakes and jumped out and hand propped the engine. It started on the second pull. I got back in and was questioned by Dan about the start up. I explained the starter wasn't very powerful. He was very admit about monitoring the amp meter which proved the electrical was all working fine. We even turned on all

the lights and back off to make sure altimeter was charging. At this point we taxi down to 25 for a runup. Runup was good and cycled some of the electrical just to be sure. All good we departed runway 25. I made a left crosswind then a left downwind. During downwind Dan asked to take the controls. I stated "your plane" and he replied back "my plane." Dan turn left base to final. He aimed at the temporary grass runway that was located close to the wind sock. It was very short (400ft) but had lots of grass before and after it. While descending he stated we wasn't going to land that he just want to see the approach. I pointed out the flap indicator (top left) and noticed he had full (40°) flaps in. Timing is so hard to judge in this predicament but I'd guess he only had the flap full for approximately 8 to 10 seconds when he said OK we are going around. We were 100ft or so above the ground. I don't recall looking at altimeter so I'm guessing. Full power and carb heat off. I thought all was good until he quickly stated "whats wrong with your flaps." Dan continued to control the aircraft as I started to remedy the problem. I cycled the switch many times with no luck. Dan started to slowly turn left. I remember seeing houses and power lines in front of us as I looked up. Dan continued a slow left turn as I checked breakers, cycled master and returned to try flap switch. No luck. I continued trying the switch until we were pretty close to the ground.

Dan stated "we are not going to make it back" and said "we are going to land in the corn." I turned fuel off and switch master off. I double checked our seat belts and popped my door open as I could hear corn hitting the landing gear. I remember the stall horn was screaming loud as we settled in the tall corn. It was smoother than I expected. About the time the aircraft was almost stopped it flipped upside down. It stopped and Dan started shouting "lets get out." He was quickly moving while I almost paused to think about it. Seatbelts are actually more difficult upside down. I exited the plane and within minutes could hear people shouting. There was no smoke or fire and my phone was dead from capturing the airshow excitement all day. Dan made a call with his but no clue who he called. I climbed on the aircraft and stood between the landing gear. I could see a police officer above the corn. He was standing on top of another patrolmans car as he drove by. We were quickly located and was able to exit the corn field. A ambulance check both Dan and I out. We were both uninjured. The rest of the evening was spent answering everyones questions and trying to get back to the hotel.
