

NATIONAL TRANSPORTATION SAFETY BOARD PILOT/OPERATOR AIRCRAFT ACCIDENT/INCIDENT REPORT

This form to be used for reporting civil and public aircraft accidents and incidents

BASIC INFORMATION

Accident/Incident Location

Nearest City/Place: Augusta State: Ks

ZIP: 67010 Country: USA

Latitude: 37.740928 Longitude: -96.984266

(Enter in decimal degrees or degrees:minutes:seconds)

Accident/Incident Date/Time

Date: 08/15/2021 Local Time: 4:30 pm

mm/dd/yyyy

Time Zone: Central

Collision with Other Aircraft: ☐ Midair ☐ On-ground ☒ None

AIRCRAFT INFORMATION

Registration Number: N56179

Manufacturer: Skyraider

Model: 1

Serial Number: 74

Year of Manufacture: 2002

Amateur-Built: ☒ Yes ☐ No If Yes: ☒ Kit/Plans ☐ Original Design Make: Skyraider

- ☐ IFR-Equipped and Certified
☐ Commercial Space Flight
☐ Unmanned Aircraft

Maximum Gross Weight: 750 lbs

Weight at Time of Accident/Incident: 625 lbs

Number of Seats: 1 Flight Crew Seats: 0

Cabin Crew Seats: 0 Passenger Seats: 0

Number of Engines: 1

Category of Aircraft

- ☐ Airplane
☐ Balloon
☐ Blimp/Dirigible
☐ Glider
☐ Gyroplane
☐ Helicopter
☐ Powered Lift
☐ Rocket
☐ Ultralight
☒ Unknown

Type of Airworthiness Certificate

(Check all that apply)

Standard

- ☐ Normal
☐ Aerobatic
☐ Balloon
☐ Commuter
☐ Transport
☐ Utility

Special

- ☐ Restricted
☐ Limited
☐ Provisional
☐ Special Flight
☒ Experimental
☐ Special Light-Sport
☐ Experimental Light-Sport

- ☐ Certificate of Authorization or Waiver (COA)
☐ None ☐ Unknown

Landing Gear

(Check all that apply)

☐ Retractable

- ☐ Tricycle ☒ Tailwheel
☐ Amphibian ☐ High Skid
☐ Emergency Float ☐ Skid
☐ Float ☐ Ski
☐ Hull ☐ Ski/Wheel
☐ Other Launch/Recovery System
☒ None ☐ Unknown

Engine Type (Select one)

- ☒ Reciprocating ☐ Liquid Rocket
☐ Turbo Shaft ☐ Solid Rocket
☐ Turbo Prop ☐ Hybrid Rocket
☐ Turbo Jet ☐ None
☐ Turbo Fan ☐ Unknown
☐ Electric

Fuel System Type (Reciprocating)

- ☒ Carburetor ☐ Fuel-Injected

Engine	Engine Manufacturer	Engine Model/Series	Manufacturer's Serial Number	Date of Mfg. mm/dd/yyyy	Rated Power ☐ Horsepower or ☐ lbs of Thrust	Total Time (hours)	Time Since: Inspection (hours)	Overhaul (hours)

Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Lost engine RPM at about 150' altitude and climbing on takeoff. I dropped the nose to try and gain airspeed then flair. All I could do was flatten the decent on impact and hit flat on belly, jamming gear straight up and crushing the firewall/cabin area upward. The firewall was moved back and upward and landing gear jammed up into the sides of the fuselage. On impact, the plane didn't slide 20'.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

I had purchased this Skyraider back in February from the individual I sold it to in 2018. In the two years he had it he had taxied it a lot trying to get comfortable to tailwheel aircraft. He said he only flew it about 4 times and left it sitting in a hanger collecting red Oklahoma dirt and mud doobers. He had never annualized the plane.

I have been cleaning and removing the doobers from the wings and fuse most of the spring. I had replaced fuel lines from the wing tanks to header tank and new cutoff valves along with a new fuel filter. I believe I first fired it up in late March or early April to start checking the engine performance. After several runs of the engine checking temps, EGT's and RPMs, I took it to the field and did several taxi runs on April 30th and made several high speed taxi's up and down the runway. On May 6th I made more runs and then took off and flew around the pattern and landed. All numbers looked good. Again on June 3, I made taxi runs and then another flight around the field and our addition for about 30 minutes and landed. I made one last flight on July 5th for about 1 hour around the Augusta area staying close to my landing strip. Everything was good with the note that the MAG EGT was running about 50 degrees cooler than the PTO.

I then scheduled to have Michael Frazier who has done the condition inspections on my Champ to come and do my annual condition inspection. We had it set for Thursday August 19th. Sunday the 15th was nice and calm so after cleaning the Skyraider I thought I would take it up one more time for a quick around the patch flight to check everything out.

The Accident:

I pulled the plane to the field, unfolded the wings and completed my pre-flight. Plane started as usual and I began the warm up. During warmup I did a high speed taxi, raised the tail and slowed back down. I then turned around and taxied back to the south end for take off. After a mag check, I added 10 degrees flaps, held the brakes and applied full throttle. I lifted off in probably 200 to 300' and continued on a steep climb at about 50 mph climb when the RPM dropped from 6000 to about 5000. At that point I didn't panic but lowered my nose, made a gentle right bank looking ahead at the house due north. As I gently turned to the east to get to clear land the RPM dropped to almost nothing but did not quit. At that point I was slow and probably less than 150' altitude. I lowered my nose more trying to gain speed to flare but could not gain enough and was only able to flatten the decent at impact landing directly on the belly of the plane. The plane probably didn't slide 20'. On impact I lost movement and feeling in both arms and had severe neck pain thinking I might be paralyzed. After a few minutes, my fingers on my right hand began to twitch and eventually I was able to move my arm enough to get to the gas valve and shut it off then over to the ignition switch and shut it down also. A couple minutes later my left arm started coming back and I was able to reach my phone and call my wife to let her know where I was and to call EMS. I unbuckled my harness and sat and waited for someone to arrive hoping nothing would catch fire. I got my arms propped up enough to hold my neck stable and my wife found me in about 10 to 15 minutes. The first EMS vehicle showed up about 5 minutes after her and the rest of the vehicles about 15 to 20 minutes later. I instructed them how to fold the wings so I could exit the door and was placed on the spine board and transported to Wesley Hospital in Wichita.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

I guess you could say I should not have flown the plane until the condition inspection but my rational was in a single place I was going to have to make the flight and determination if everything was functioning properly anyway. I made several short little flights close to the field with any adjustments I felt might be necessary. On the previous flight I noticed a 50 degree difference in EGT temps. I probably should of pulled the plugs and checked them but the 50 degrees was still in a safe temp range and that is what I was going to check on this flight. The second thing was when the RPM dropped, I leveled off and made a gentle bank thinking I could hold altitude and bring it back around as long as the RPM stayed at 5000. I should of dropped the nose immediately and keep my speed up and made the force landing. By banking away from the house thinking of making a turn, I lost altitude and speed before the engine reduced in power even more.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)Was there Mechanical Malfunction/Failure? ☐ Yes ☐ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)
