☐ In-Flight ☐ Fire at Unknown Time
☐ On-Ground ☐ Unknown

Aircraft Explosion

- ☒ None ☐ Both Ground and In-Flight
☐ In-Flight ☐ Explosion at Unknown Time
☐ On-Ground ☐ Unknown

Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Damage to propeller and left bottom cowl, possible firewall damage. Struck VASI light box at end of runway 14.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

On 9-15-21 I arrived at KCBF at 7:00AM to practice solo take off and landings. Prior to flying that morning I inspected the interior and exterior of the aircraft with no discrepancies noted. I checked and listed to the weather conditions, set altimeter and heading coordinator.

At or about 7:30AM I taxi'd to runway 14. Prior to take off I followed the checklist and conducted runup procedure with no issues noted.

After runup procedures I announced to KCBF traffic that I was departing runway 14 and would be executing touch and goes.

Take off, crosswind, downwind, base, final and landing were unremarkable.

After front wheel landed on the runway during the landing I looked down and lifted the flaps, then pushed in the carb heat and applied full power for a touch and go take off. When I looked up I realized the plane had drifted to the left side of the runway and I was no longer on centerline of runway. I began to add right rudder but the aircraft didn't initially move to the right so I added more right rudder. At this time the aircraft had gained more speed and the right rudder took effect and moved to the right harder and the aircraft began to lift off and fly. Because the aircraft wasn't going straight down the runway and was pointed in the direction of the airport, I pulled back the throttle in attempt to make a safe landing and gain control and direction of the aircraft.

When the aircraft came down it was what I would describe as a firm flat landing and the aircraft was in the grassy part on the right side of the runway. I had my feet on the rudders, not the brakes and I tried to get the aircraft back on the runway, and the aircraft went across the runway to the left side of the runway into the grass. I realized at this point that I hadn't pulled the power all the way back to idle as I didn't want to have a hard landing. I pulled the power back to idle and moved my feet up to the brakes and tried to slow the aircraft down but I was nearing the end of runway 14, so I went for the grassy area to the right of the runway as runway 14 has a steep drop off at the end. While on the grass, it was wet and the aircraft slid and I hit a large yellow light at the end of the runway causing damage to the aircraft.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)

Was there Mechanical Malfunction/Failure? ☐ Yes ☒ No
(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)
