Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Landing gear collapse, damage to prop, empenage bent, fuselage bent

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Time of incident was about 1:30 pm. I was landing on multiple grass strips on the field. Conditions were clear with a light and variable wind from the south. Located in a valley with tall ridges on both sides so there is a possibility for down drafts and rotors. Weather conditions are determined visually as there is not on site reporting and no cell service. Departing strip called Traveller and making a left 200 degree turn, over trees, to land on cross strip called Grit. Picked up a tail wind and/or sinking air in the turn and experienced rapid sink. Throttle was at or near idle, when I added throttle the engine stumbled and I was quickly losing airspeed. I leveled the wings and lowered the nose to maintain control of aircraft and flew the best route available to me at this point to avoid structures, private property and clear trees and proceed to land. I clipped a tree with my left landing gear and it spun me around and landed in a relatively flat attitude facing the opposite direction of flight. Aircraft remained intact. I turned off the master switch, fuel shutoff valve, ELT and exited the aircraft.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Maintain greater safety margins in regards to air speed and altitude. Be prepared to deal with changing wind conditions when they are light and variable and performing these types of maneuvers.
