

RECORD OF CONVERSATION

Aaron M. Sauer
Senior Air Safety Investigator
Central Region

Date: 12/09/2022
Person Contacted: Multiple Huerfano County Sheriff's personnel
RE: CEN22FA064

Narrative:

The Huerfano County Sheriff's personnel, who responded to the accident site shortly after receiving the report of a missing airplane, reported the winds above the canyon rim were different in intensity and direction than the winds encountered within the canyon. The winds within the canyon were strong and variable dependent on the terrain features. Due to the intense and unpredictable winds, the pilot was unable to be extricated by helicopter until the next day.
