

Marty Jolliff

On 3-25-22, I Marty Jolliff was outside at my daughters house at [REDACTED] which is approximately [REDACTED] South of the helicopter crash site. I heard a helicopter but didn't think much of it until after about a minute I noticed that it sounded like it wasn't moving. I looked up and it was hovering in the same place. I assumed it was taking photos of the area around home depot. I kept watching and it moved South about 100ft and hovered in place again. After about 10 seconds it moved South again about a hundred feet and hovered and then something flew off of the helicopter to the East and the helicopter started going backwards and the tail end went towards the West and then the whole helicopter started spiraling and falling about a hundred feet then stabilized and stopped falling and spinning for a couple of seconds then started spinning again and nose dived straight down to the ground. Whatever came off of the helicopter looked like it was 200ft. to the East the last time I seen it. I am from Centralia, IL and was here visiting my daughter & grand kids,
