

I observed 78B land on R22 and continue down the run way. ~~When~~ I observed 78B began to take off without stopping, I observed he was close to the end of the run way. When he took off, the flaps was still down. I observed he ~~was~~ was close to the top of the trees. I then observed the plane had a nose up attitude, at which time the plane left wing dropped and I observed the plane go straight down.
