Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Tail rotor detached and broken. Landing gear damaged. Tail boom, vertical and horizontal tail stabilizer broken.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Went thru all pre checks, made the call to pick up from runway, and taxi out to ramp. Picked up as normal, then lost control, the helicopter swung to the left, went to add left pedal over corrected with right pedal and rear on cyclic, helicopter began to spin, pulled up to keep from hitting ground, then i just remember hitting ground and rolling throttle off.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Not sure if the helicopter parallel running at full RPMs had something to do with the loss of control. The helicopter feels extremely different after all those hours with an instructor in it
