On March 27, 2022 at 16:10hrs I was operating 1993 Air Tractor AT-401 N9192E conducting aerial application on a field making my last mop up pass before returning to home base to get another load. At the end of the pass, the engine began to spit and sputter and miss. I exited the field and climbed over and cleared the tree line and cross-country transmission power lines directly in front of me. The engine again began to pop and backfire and I examined the area for a safe place to land. There was no need for an emergency dump as I had finished the load and was empty of spray. The engine stopped running then started back two or three times as I was maneuvering towards a pasture and turn row. The engine then completely quit and I had zero power. I was on a heading of 170 degrees. I touched down approximately 60-70 yards from the turn row. The plane traveled towards the turn row which was elevated. The elevation in the turn row allowed the plane to jump over the water filled ten feet deep ditch on the other side. The airplane settled back down but was sliding across the field rows. My right wing then clipped an irrigation power unit in the corner of that field. The impact turned the plane in a crab position and bounced. The wing and engine impacted the ground and caused the plane to cartwheel over upside down and slide for approximately 35-45 yards to a stop. I was hanging upside down in my safety harnesses and succeeded in removing them. I fell to the top of the cockpit and attempted to pull the emergency door release but was unsuccessful as the cockpit and door was partially collapsed and pinned by the dirt. I then crawled out of the left door window, removed my helmet and glasses I was wearing and awaited assistance. A couple that witnessed the crash arrived to me first followed by Law enforcement, fire department, my son Jonathan, and paramedics. I was placed on a stretcher and taken to the ambulance where I was transported to St. Francis Medical Center Emergency Room where I was fully examined and treated for several bumps and bruises to my arms, chest, face, and two black eyes. My arm was also treated with stitches where I cut it climbing out the broken window. I had a complete workup at St. Francis. I received X-rays and CT scans of my head, neck, chest, abdomen, and arm. I was held for observation Saturday night, Sunday, Monday, and released on Tuesday. Due to the bruising on my chest I received EKG's, Echocardiograms, and a heart stress test. The airplane had approximately 35 gallons of fuel in each wing and had been running perfectly for the previous 13 loads of the day. The latitude and longitude of the field where the accident took place is as follows: 32 31' 11.28N / -91 42' 14.92W. The field I was spraying and the field where the accident took place are all part of Trio Plantation which is farmed by Jordan Planting Company.
