Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Nose strut and right main wheel strut bent, right wing tip bent, right horizontal stabilizer bent, prop strike

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

My student and I took weather information from foreflight. We preflighted, completed our runup in the C1 runup area and took off from Runway 17L. We flew to the south east practice area and performed several private pilot maneuvers. We then came in for full stop landing. We were cleared for straight in for runway 28.

My student landed N711DA on runway 28 centerline under my supervision. After touchdown, while my student was slowing down the aircraft, it started to move right of the centerline. For correction, he then started to add left rudder but the aircraft kept deviating further to the right side. At which point, I took the controls of the airplane. I also pressed the left rudder and both the breaks together with aerodynamic breaking. However, the aircraft continued to drift to the right. At this point, I started to hear rumbling noise from the nose wheel of the aircraft so I added little back pressure to keep the nose off the ground. Given the course of the aircraft, it 's nose wheel hit the C4 taxiway sign. After that the aircraft went steep right into the grass area and ended up in a ditch bringing the aircraft to a complete halt. Because of the sudden stop, my headset fell on the floor. My student then contacted the tower to tell them that we were fine and that we needed assistance.

Operator/Owner Safety Recommendation

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)**Was there Mechanical Malfunction/Failure?** ☒ Yes ☐ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)

It could be Nose wheel struck, Rudder pressure, Break malfunction, Break Hydraulic Manfunction, Tire malfunction.
