On Tuesday, May 3rd, 2022 I flew the RV 6A airplane from K12Y to KMKY, to hangar the plane. The weather was clear and calm on the evening of May 3rd, 2022; upon my departure from K12Y. This was approximately somewhere around 7:15pm - 7:45pm.

It took me approximately 4 - 5 minutes to reach KMKY. I initially made my first call about 10 miles out from KMKY, stating my intentions of landing. I entered the downwind pattern at KMKY for runway 15, making my downwind announcement. I began to slow the plane, reducing the RPM to 1,800. I did my landing checklist on my downwind to runway 15. Once I reached the numbers 15, (over my left shoulder), on the end of the runway, I observed the RV 6A speed indicator, in the white arc, and I added one flap (I was past the numbers 15 at this time). Then I made my turn to base with an announcement of my intentions. I turned final, made my announcement for "final" on runway 15. I was keeping the RV 6A airplane at a speed between 85-90mph, altitude was correct. During my final approach, I added another flap.

As I closed in on runway 15, I cut the RPM to 1,000 then to 700RPM. Once I made the runway, I cut the power and flared, touching down with the rear wheels onto the runway, keeping the nose up, using the wing as a brake. I was gliding in, nice and easy, when the rear wheels made contact with the runway. I had total control of the aircraft and slowly let the nose down to finish my landing. The second the front wheel touched the runway, the plane lurched to the side and this forced the front end of the aircraft up (bouncing). At this point, I impacted the interior of the RV 6A and lost consciousness. I was able to retrieve my cell phone and call my wife, whereupon: she initiated the emergency calls. I also called 911 at this time. Much of the time frame following the crash is still fuzzy to me as I suffered a traumatic brain injury.
