Description of Damage to Aircraft and Other Property (Use additional sheet if necessary)

Both wing severely damaged, nose wheel ripped off, Propeller all 3 blades severely, right main bent under, Hull undercarriage damaged

NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

We departed KALC at 6 AM on a IFR Flight Plan. We were planning on going to Glendale, AZ with a scheduled fuel stop in Amarillo at KTDW. We were flying on autopilot and did not come up on any clouds until we were close to destination. We were cleared for approach and went through my checklist preparing for landing. I switched fuel tanks, Prop full forward, Mixture full forward, gear down and flap. We were on RNAV 35 approach broke through the clouds had the airport in sight on the glidepath about 400ft AGL and I would say we were 2 to 3 miles from airport and notice Airspeed was bleeding off and I gave it full power and then realized we lost our engine and I switched tanks immediately and nothing. We were losing altitude and knew we could not make it to the Runway and decided to put the plane down in a cow pasture to the east because if we kept going straight we would have hit houses. From the time we realized we lost the engine, til we put it on the ground could not been more than 8 to 10 seconds or at least that is what it felt like. I just glad we didn't lose our engine going over the mountains going to Glendale AZ. One thing I left out as soon as I knew we lost our engine I retracted the flaps and pitched down.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

I don't know what happened to my plane yet, but I will continue to do a thorough walk around on my plane and keep the plane up mechanically and up to date on A.D.S at least I will if I get another plane.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)Was there Mechanical Malfunction/Failure? ☐ Yes ☐ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)

Do know yet until a mechanic can take a look at the Plane
