Description of Damage to Aircraft and Other Property (Use additional sheet if necessary)

Damage was only done to aircraft. Damage to engine, prop, cowling, firewall, nose gear.

NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and and location, services obtained, and intended destination. Provide as much detail as possible.

I did one warm up flight with my instructor prior to the accident. After the warm up flight I dropped my instructor off at the hangar to the flight school. I obtained my ~~ATIS~~ ATIS information and contacted ground. I advised ground that I was a student pilot solo and received taxi clearance to Runway 17 via Taxiway A to do hold short of Runway 13. There was one aircraft in front of me holding short before takeoff. The aircraft was a small GA Mooney Bravo. After the Mooney Bravo took off I contacted tower. Tower gave me take off clearance for Runway 17. I crossed Runway 13 to 17 slowly applied take off power. The plane reached rotation speed and I pulled back slightly on the yoke. While climbing I noticed the plane drifting to the left I tried to correct the left drift with right rudder. I did not apply enough right rudder and the plane continued to drift to the left. At this point I felt very uncomfortable with what was going on. I saw I had enough runway to land on decided to abort the takeoff before I got away from the airfield. I pulled the flaps lever & reduced power to idle. I landed back on Runway 17 with ~~about~~ about 700 ft of runway. I applied brakes but the plane had too much momentum and would not come to a complete stop before the end of the runway. The plane overshot the runway that when the nose gear came off & the plane came to a sudden stop.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

This Flight was my Second student Solo. I was Very Nervous and the heat of the day was high! The Best thing would have been for me to Abort the take off before the plane took off the ground.
