NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

I took off from F87 at approximately 1525 on June 9th, 2022. Completed pre-flight check list and runup with no indication of any issues. I took off from runway 16 and climbed to 7,500 feet. En route to KHUM I descended to 5,500 feet and then to approximately 3000 feet in order to stay below lower clouds and maintain VFR. Sometime after leveling off at approximately 3000 feet, an alarm went off indicating that my oil pressure was low. I silenced the alarm and confirmed with my analog gauge. I then used the 'nearest airport' feature on my GPS and turned toward the nearest airport. En route to nearest airport I attempted to troubleshoot the issue and attempted to gain altitude but I was unsuccessful. The engine was still running but very sluggish and unable to gain altitude. I saw what I think to have been the clearing of nearest airport (Olla, which is not in service but was closest). There were only dense trees between me and the clearing and I did not believe I could make it there. I scanned the area and located 2 fields, both of poor quality. 1 field to my right and the other slightly to my left. There was also a small windy road to my left and behind that I did not feel was an option. The field to my left was noticeably longer and I decided that that would be my best option. Once mains were on the ground, I tried to keep nose wheel off the ground but am unsure how long I was able to keep it off. It was a very bumpy ride due to tree stumps, and my vision was not great due to the bumps. As I recall, the plane dropped to my left, spinning me approximately 90 degrees and bringing the plane to a stop. After exiting the airplane I learned that my left main had come off causing me to fall on the left wing, which brought me to a stop. I called my family and the KMLU tower by phone. I was able to get my coordinates from the ForeFlight app on my ipad and ultimately relay this to the Lasalle Parish Sheriffs Department and they were able to locate me.
