I'm WakaasAbdrzak the PIC on the airplane on 06/05/2022

We went on familey visit to Houston,Tx from KHQZ-KDWH,was my wife and dughter on bord

Every think was normal starting from preflight the aircraft to the runup,take off,and final landing both way

on the coming back about 12nm from Mesquit airport swiched from the reginol approch freq to Mesquit tower freq and gave my postion and what I need to do , the contoroller directed me to enter left down wind for RWY 18

once I reached mid field tower cleared me to land

started my landing procedures backed up by the checklist in my lap

after adjusting my air speed to the Gear extended speed ,I extended the gear and green light came on withe down gear sign as well on the bottom of the front panel

turnde final and preformed GUMPS cheklist very stable approach and all good ,we tuched down soft landing and start rolling to exit the RWY

My power were on idle and air craft on low speed ,thats when the nose gear collaps and prop striked the concrete surface ,the engine shut off and we skid on the runway

immediatly I shut the masterand the ignition and fuel selector valve

and then we exit the plane me my wife and my dughter safley no injury and plane got som minor damage

My wife were filming starting from turning final to the landing.
