Description of Damage to Aircraft and Other Property (Use additional sheet if necessary)

Left landing gear seperated from the aircraft ~~on the~~ Left flap & wing are damaged. Left fuel tank is damaged.

NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and and location, services obtained, and intended destination. Provide as much detail as possible.

On Monday June 20th, 2022 around 12:55pm I landed to obtain fuel & my third load of fertilizer of the day. The hopper was loaded & fuel level obtained was $\frac{3}{4}$ of a tank. I verified this by using the $\frac{3}{4}$ tabs in the tanks. I reentered the cockpit. Put on my shoulder harness & lap belt. Put on my helmet. Then started my takeoff roll. Power was set to keep the ITT from exceeding its limits. The tail came up and back pressure was applied to bring the aircraft airborne. It broke ground and was 1-2' in the air then settled back down. More power was applied. The plane was barely airborne. At the end of the strip was a berm hidden in tall grass. The left landing gear struck it seperating from the aircraft. The fertilizer was put out to reduce the weight of the aircraft. Short final on runway 13 @ KM 19 the fuel condition lever was put to off. Touched down on the right main. Held it on the right till the tail touched. Rode those two till there was not sufficient lift to keep the left wing aloft. It slid to a stop roughly 90° from the original heading.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Lighten the load.
