Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Landing gear destroyed
Main rotor blades contacted ground and clipped tailrotor driveshaft guard

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

On my approach to land on a support truck, the helicopter started to flare. At this point, the engine RPMs dropped and then spiked. From there, I went to an autorotation to get away from surroundings. When I landed the skid broke and the main rotor blades hit the ground which made it bounce. At this time, the retreating blade hit the tail rotor shaft cover.

The weather was clear and the support truck was in a safe location for landing at the East Troy airport.

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)
