Aviation Safety - Central Region

Subject: CEN22LA318 Maintenance Records Summary

A review of the helicopter's maintenance records found that the last inspection was a 100-hour type, logged on July 2, 2022, where the mechanic documented compliance with AD 73-20-03. AD 73-20-03 compliance was also logged on previous inspections dated June 7, 2022, April 21, 2022, and April 5, 2022.

The main rotor hub assembly was last overhauled on January 18, 2018, and installed on the helicopter on December 14, 2018, with a time since new of 1,116.4 hours. On September 6, 2017, the main rotor hub was Zylgo inspected, and no defects were found.
