Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

FOD Damage to Fenestron and surrounding area.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Upon return-to-base after a transport flight, after hover taxiing the helicopter to the normal parking position, the aircrew experienced a large jolt to the tail of the aircraft just as it was being lowered to the ground. The pilot continued the landing from the hover position – (with no perceived loss of tail rotor control authority). Upon shut-down and post-flight, it was found that the tail fenestron (enclosed tail-rotor) had ingested a red, cloth fire-extinguisher cover bag from the adjacent fuel farm (portable fuel bowser). The metal fenestron hub cover was detached and torn into multiple metal shards; some impacting the fenestron frame and others being scattered as debris. There were no injuries to flight crew or ground personnel.
