Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Aircraft: Left and right wings damaged requiring repair or replacement. Engine will require check, repair or rebuild due to prop strike. Spinner on prop damaged requiring replacement. Comm/intercom panel volume knob broken, requiring repair. Windscreen scratched requiring repair or replacement.

Property: Corn damage. ~1-5 bushels lost.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

I departed Coles County (KMTO) approximately 18:54 CDT and flew direct to Busboom RLA (0LL5). Approximately, 25 miles south of Champaign (KCMI) I contacted KCMI approach controller on 121.35 for traffic advisory with 0LL5 as final destination and was granted service. Within approximately 2 - 4 miles from 0LL5, I reported field in sight to approach controller and traffic advisory was terminated with no area traffic a factor.

I proceeded to setup for the downwind leg for runway 27 of 0LL5 at approximately 1675' pattern altitude. Following the base leg then final approach, I was setup for a normal 20 degree flap landing to runway 27 of 0LL5. I determined I was high on approach so increase flaps to approximately 25-30 degrees. I touched down left of the center line when the left wing struck mature corn on the left side of the runway. This resulted in loss of directional control and sent the aircraft further left into the corn field. The aircraft came to stop in an inverted position at approximately 19:30 CDT.

Both passenger and I exited the aircraft without any known injury.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

* Recognize that the aircraft was too far left of centerline on approach and initiate a go around to retry the approach and landing.

* More proficiency training with a CFI
