Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Clipped off top portion of Vertical Stabilizer and Rudder. Broke wire deflector. Damage to power line and wheat field.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

At approximately 6:30pm on Thursday July 21st, 2022, I took off from a private strip (Agrimax) to the south. I intended to spray a field a couple miles from the air strip. There are two sets of power lines to the south of the air strip. I opted to fly under the wires. I misjudged the height of the second set of wires. The result was a wire strike that damaged the top part of the vertical stabilizer and rudder. The rudder was jammed and I had no rudder control. I opted to make a forced landing in an abandoned, wide open, flat wheat field. After landing I shut down the aircraft. I did not receive any injuries. The airplane sustained minor damage to the vertical stabilizer and rudder. No services were required.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

I could have made the decision to fly over the wires, instead of going under.
