Description of Damage to Aircraft and Other Property (Use additional sheet if necessary)

Damage to prop, belly of the plane & leading edge. landing gear left collapsed damaging left wing

NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Departed AWG on 7/2/22 around 5:50am to BPRAY 7500 by wayman
 circled the field - seen the windmill on south edge of the field & started
 to spray the field. when lining up against with the wind mill, I
 pulled up to clear the obstacle I hit a pocket of dead air
 causing me to hit the windmill in the centre of my plane.
 I gained altitude right away, checked my gauges, brakes &
 pulled the power back to stop the vibration from the prop
 damage. upon returning to AWG I lined up with the runway
 upon touching down I felt my landing gear on the left
 collapsing. I held my wing up as long as I could. until my
 wing came down & touch the ground causing me to be pulled
 off the runway. I killed the running engine & got out.
