Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

I was flying by myself at night over Libertyville around 2000 ft MSL when I started getting engine roughness. I completed the Engine Out checklist that included turning the carburetor heat on, fuel pump on and changing the fuel tanks etc., I switched to the right tank (from left tank). I had already picked Milwaukee Ave as my landing spot that was lit, because I didn't have many other options that were lit with such a low altitude. I tried to start the engine three times. It would try cranking but wouldn't start. So I setup for landing and I did the best I could to dodge the big obstacles (trees, power lines, road signs), I managed to get in front of the cars that I knew could brake behind me. So I landed on the road, and pulled the brakes to stop airplane from going over railway tracks in front of me. During the round out on the road, the airplane outboard leading right wing was damaged from hitting a road sign. Finally, I secured the airplane, No one was injured.
