RECORD OF CONVERSATION

T.W. Cook, Southern Aircraft Recovery

October 26, 2022

Interviewee: T.W. Cook, Southern Aircraft Recovery
Date/Time: October 26, 2022 / 1500 CDT
Location: Telephone Call
Investigator: Andrew Todd Fox, NTSB Air Safety Investigator

Mr. Cook and NTSB Investigator Fox discussed the following:

Mr. Cook stated that he inspected the cockpit and found the fuel selector in the OFF position before the airplane was recovered from the accident site. The right wing tank contained about 15 gallons of fuel, and the left wing tank contained about 6 gallons of fuel. In total, 21 gallons of aviation fuel were recovered from the airplane during wreckage recovery efforts.
