

Shaun Williams  
Senior Aviation Accident Investigator  
Office of Aviation Safety - Central Region

**Date:** 12/29/2022

**Subject:** CEN22LA435, N711DM Damage Assessment

**Contact:** David S. Johnson, Principal Maintenance Inspector, FAA

In an email dated September 29, 2022, Inspector Johnson stated that upon inspection of N711DM, he discovered that the lower engine mount bolts pulled part of the fuselage attaching structure through the firewall as the nose landing gear collapsed.
