Subject: CEN23FA167 (Lewisville, Arkansas) GRT 2000 and AvMap EFIS Ultra Email Report

Email Report Instructions

The narrative and attachments from this email report may be used in other reports at the discretion of the IIC. This email, including attachments, should also be placed in the public docket by the IIC.

Email Report

The Vehicle Recorder Division received a Grand Rapids Technology Model 2000 (serial number 9491) and an AvMap EFIS Ultra (serial number 6020501) from a Titan Tornado, registration N31311. Both devices arrived exhibiting signs of mechanical impact damage (IMG_0171.jpg and IMG_0175.jpg). The EFIS Ultra was confirmed by the manufacturer to record no data. The Model 2000 is capable of displaying last engine run time and total engine time, but the screen was damaged and would not power on. No data was recovered from the device.
