

Alexander Lemishko
Senior Air Safety Investigator
NTSB, Central Region

Date: May 14, 2023

Subject: Memorandum for the Record CEN23FA187
Witness Statement Summaries

Contacts: Alexander Lemishko - NTSB IIC

Several witnesses provided the following information to the NTSB IIC:

On Sunday night, about 9:45 PM, I was in my room watching TV and I heard an airplane It was pretty loud. It sounded super low to our house. The weather was awful, and it was misting. There was little wind. Jasper Metschke ([REDACTED])

On Sunday night around 9:45 PM, I was sitting in our family room. I heard a airplane that sounded like it was really low and slowing down. The sound it made was like “ra, ra, ra, ra...” pretty slow. It was a foggy and misty, rainy night with minimal wind. Tessa Metschke [REDACTED]

On Sunday night, about 9:45 PM, I was sitting on the couch, and I heard an airplane that sounded like it was just above the house. I looked at my daughter and said, “Wow that sounded like it was extremely low.” It sounded like it was trying to slow down or maybe just going slow. The weather was bad. Misty rain and foggy. Kim Metschke [REDACTED]

On Sunday night, between 9:30 and 10:00, I saw a airplane flying very low slightly above tree top height near the Metschke residence. He saw the airplane’s landing light was on and saw the flashing lights of the airplane. He thought that it was strange that the airplane was flying so low to the ground. The clouds were very low with misting rain. Brian Hubal [REDACTED]
