CEN23FA220 - Review of dashcam footage

Mr. Troy Uyematsu

Mr. Uyematsu was traveling east-bound in his car on Interstate 80 in Gibbon, Nebraska on June 2, 2023, at about 0905 central daylight time, when he witnessed an airplane in a nose-down attitude flying very close to the ground. He captured the airplane on his car dashcam.

Mr. Uyematsu gave the recording to the Nebraska State Police who gave the recording to the NTSB investigator in charge (IIC). The IIC reviewed the footage and saw N977RV in a near vertical nose-low descent impact the ground just south of Interstate 80. The footage also showed that it was raining heavily at the time.
