Importance: High

Stephanie,

Thank you for the updated medical information that was provided by the student pilot's mother.

Sincerely,
Andrew Todd Fox
NTSB, Air Safety Investigator

Todd, in response to my question of whether she had awareness of any medical conditions or medications being taken by her son or husband, below is Mrs. Bishop's response.

Steph

Ethan had high blood pressure for the last few years. Due to moving he had a few different doctors in that time period and they all felt that his blood pressure was not high enough for him to be put on any type of medication with the exception of his most recent doctor in TX. His blood pressure was not higher than normal, just a difference of opinion. To my knowledge Ethan had just gotten his prescription within the last couple of weeks before the accident. I'm not sure exactly what it was and haven't been able to locate the bottle. It would have been filled at the Walgreens in Magnolia, TX.

That is the only thing that was abnormal for him and Elijah did not have any medical issues.

Thanks,
Diana
