Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Substantial damage to left wing and left wing tip. Belly skin ripped off.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Departed on a cross-country flight from Marion, Indiana, to Danville, Illinois. About 10 miles from Danville, I elected to make a precautionary landing in a field due to low fuel. During the approach to land, I noticed obstacles and attempted to maneuver the airplane away from the obstacles. Getting close to the ground, the airplane touched down smoothly. However, during the roll out, I saw a ditch ahead and tried to avoid the ditch. Then the left wing contacted the ground and airplane ground-looped. I and my passenger exited the airplane uninjured.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

In hindsight, I should have fueled at (2H0) Shelby County instead of flying on to (DNV)

My plan was to fly 3 hours, 15 minutes for fuel. But plans don't always go as planned. For some unexplainable reason, I did not have that much fuel on board.

The fuel gauges bounce around unlike stable electrical fuel gauges. My gauges were bouncing between 1/4 & 1/2 full. I should have taken the more conservative amount of 1/4 full instead of the higher 1/2 amount.

In the future, I will rely on both the time in flight AND the fuel gauges matching. If one of those factors is not lining up, I will go with the least amount.
