Description of Damage to Aircraft and Other Property (Use additional sheet if necessary)

A/C pancaked in
 Engine separated from mounts
 Tail crumpled.
 Cockpit Destroyed

NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Clear day, wind 300/12-15 knots, proceeded from KOJC to
 K81 outside downwind heading south/southwest at 1000
 AGL-1900-2000 MSL performed before landing check list.
 Runway 030- direct crosswind, landing a little long,
 probably firm do to the crosswinds. Reset flaps to 1st detent pushed in
 power, normal lift off. At 100 feet felt strong decrease in power, no runway
 in front of me, still had strong right rudder from power take off,
 reached down to change tanks, both inner tanks full. Looked up to see only trees ahead,
 must have drifted right due to crosswind & rudder.
 Observed field to my right, had to climb above a tree too clear, doing so
 I think I stalled the wing. I tried to push over to gain A/S but impacted the
 ground, mostly down, not much forward vector. Turned off switches that i could find,
 broke out left window to exit the plane, expedited due to fumes in cockpit.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Not sure why Engine stopped Running
Plenty of GAS, CHANGED TANKS
