

John Brannen
Senior Air Safety Investigator
AS-CEN

Date: October 28, 2022
Subject: CEN23LA021
Contact: Christopher Wright (FAA FSDO Inspector)

Mr. Wright contacted me regarding the accident that involved Cessna 210, N36X. He said that he responded to the accident and that the airplane had substantial damage to its tail and right wing tip. He said the engine could be rotated and that no apparent anomalies were found. He said that when he examined the airplane, he found no fuel in the right fuel tank and that the tank was not compromised.
