Addendum to Flight Crew #1 Info

Retired from TWA Oct 1999 with construction of an RV-4 ongoing.

The RV flew in June 2002. In 20 years its been all over the USA.

In the 2006-2009 time frame I was 1/3 partner in a Maule MA-4 for about three years. Mostly it was a hanger queen. I flew it about 20 hours; more than the other owners combined.

The RV-4 is day VFR only. In the past 6-7 years the long trips have diminished. Cheaper to fly on airline passes. And since the COVID craziness, flying has been almost exclusively local area which accounts for the expired Med and BFR. Have not been anywhere or planned a trip.

HISTORY OF FLIGHT NARRATIVE

Landing N190Y KTOP 2 Nov. 2022

By 30 miles out I had the KTOP ATIS. Landing would be RW 18 with winds, as I remember, 170@15 gust to 20. I have made many a landing with strong headwinds. Secret to success is a stabilized approach aligned with the R/W, very cautious flare avoiding any chance of a bounce, level the A/C with wheels just above the surface, reducing power to reduce airspeed to just above normal landing speed, *place the mains smoothly on the surface, and raise the tail to keep it stuck to the surface. You are there; slow to safe taxi speed and clear the R/W.

I flew the approach exactly as planned above. Stabilized approach required a bit of left wing down to counter the crosswind component. The flare was very smooth and stabilized with the left main (I could see it) a foot or two above the surface. Power was coming back, airspeed bleeding; I had arrived at the point to set the mains (* above). At that instant 'bloody hell' broke loose. The aircraft nose pitched up, complete stall occurred, the aircraft fell striking the R/W and causing all the damage observed. At that point I was incredulous, I added power and cleared the runway, thence taxied to the ramp. Probably in shock.

[REDACTED]

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)

Was there Mechanical Malfunction/Failure? ☐ Yes ☒ No
