DAMAGE TO AIRCRAFT AND OTHER PROPERTY		
Aircraft Damage ☐ None ☒ Substantial ☐ Minor ☐ Destroyed ☐ ☐ Unknown		Aircraft Fire ☒ None ☐ Both Ground and In-Flight ☐ In-Flight ☐ Fire at Unknown Time ☐ On-Ground ☐ Unknown
		Aircraft Explosion ☒ None ☐ Both Ground and In-Flight ☐ In-Flight ☐ Explosion at Unknown Time ☐ On-Ground ☐ Unknown
Description of Damage to Aircraft and Other Property <i>(Use additional sheet if necessary)</i> MAJOR DAMAGE TO WINGS, TAIL, PROPELLER AND COWLING. CANOPY WAS SHATTERED. WE IMPACTED SOME WIRES PARALLEL TO THE STREET.		
NARRATIVE HISTORY OF FLIGHT <i>(Please type or print in ink)</i>		
Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.		

Saturday afternoon, January 14th, Scott McEwen asked me to fly his Pitts Model 12. I had previously built a Pitts Model 12 and flown it more than 230 hours. We preflighted the airplane and my son Jak and I got in the airplane, put on our seatbelts, headsets and started the engine. We warmed the engine and then taxied out for departure. The run up was good with no issues and we departed runway 14 at KCXO. After we were in the air for 3-4 minutes we had a Master warning light but I did not notice any anomalies or problems, the light went out and all indications appeared normal. The engine was running fine and we climbed to 2000 agl. After just a few minutes, I made the decision to return to KCXO.

As we turned back, the engine went through a series of making no power to power again, it was like someone turning the mags off and on. I turned on the boost pump, got a burst of power and then nothing. I changed fuel tanks, checked that the mixture was full rich, mags on, throttle position correct, and boost pump on etc. I knew that the main fuel tank was full, I changed to the aux tank to see if that made a difference. After several seconds I switched back to the main fuel tank with no change. At that point I decided that trouble shooting was not as important as flying the airplane. I saw a field that I wanted to make but the descent rate was too great. We really had no options for landing spots except a few small clearings that we could see. Our glide put us in a position to land on a road but power lines were between the road and our position and I didn't see them until we were almost on them. We could not get above or below them without jeopardizing our airspeed so I chose to maintain our present glide. The airplane impacted the wires between 70-75 mph IAS. The airplane hit the wires right wing first. The airplane rolled right and impacted the road inverted and slid to a stop. We were able to get out of the airplane, I made sure that the airplane was secured with fuel selector off along with all electrical components. We could smell gasoline so we moved

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

UNKNOWN AT THIS TIME, WE DON'T KNOW THE
REASON OF ENGINE FAILURE.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)Was there Mechanical Malfunction/Failure? ☐ Yes ☐ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)

UNKNOWN AT THIS POINT.
