Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Gear collapse from hard landing in field, resulting in prop strike

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Departed Hilltop Lakes at aprox 08:30 CST, wind was calm to light out of the south.

Takeoff and climb was normal

All engine gages were in the green.

When I was over Lake Fort I noticed a reduction in power no roughness just less power.

Checked all gages everything was fine.

Then a roughness started and I applied carb heat, it got worse and I could see I was not going to make my destination

I picked a field to land in and circled hoping the engine would clear up.

It continued to decrease in power and I could not hold altitude so I started my approach to land.

I flared too high and stalled and hit hard breaking the landing gear

Aircraft went up on its nose slightly and came to rest upright.

I shut everything off including the fuel and exited the plane.
