NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

I arrived to Dan Jones where my parents dropped me off so they could drive up to GR3 and meet me there. I did my preflight, nothing was wrong with the airplane, I checked weather, saw ceilings at Hooks were about 700ft, but I had believed at the time I could avoid it. I departed from Dan Jones and had not entered clouds. I was doing night VFR at 1200ft, I climbed for obstacle avoidance and entered inadvertent IMC at 1400ft. I was in the clouds for about 10 minutes, but I had broken out of the clouds descending on final for RW34 into GR3. There was no available WX info for GR3 on foreflight, and the AWOS had missing information, but I used WX from CXO & T78, CXO said it was IFR, but T78 said it was VFR with ceilings at 5000ft. I realized clouds were lower at GR3 so I began descending when I turned onto final. I broke out of the clouds, but only saw pitch black. I was searching for what I had hoped to be perhaps a dimly lit runway, but had no visual ref. points. I descended and soon descended far enough to strike the trees right before I was about to go-around, but I should've gone sooner.
