NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Aircraft was enroute from Skylane Airport (3EV) to Evansville Regional Airport (KEVV). I was instructed by the Evansville Control tower to enter a right downwind for runway 18. Landing was made in the first 3rd of runway 18 and was a normal three point landing. Landing was smooth and straight down the centerline. During the landing roll out the aircraft veered to the left, exited the runway and ground looped. The ground loop was counterclockwise right wing low. The aircraft stopped approximately 10 feet off the runway. Tower notified by pilot on aircraft radio of incident. Emergency vehicles arrived. Upon exiting aircraft I noticed the tail wheel lock did not appear to be fully down in the locked position. After examining aircraft it was determined that the aircraft could be taxied to the hangar.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

The Stearman operating procedure requires that the tail wheel must be locked before take off and landing in order to maintain directional control. As mentioned in the Narrative history of Flight section above, the tail wheel lock did not appear to be fully down in the locked position upon exiting the aircraft.

Possible Preventive Solutions:

- 1 This aircraft checklist contains a BOLD FACE item on the before takeoff checklist section "Lock Tailwheel".
Add a BOLD FACE item to the before landing section of the checklist stating "Lock Tailwheel".
2. The tail wheel locking lever does not have detents, which, if present, would help confirm that the lever is fully up or down.
3. Adopt a modified GUMPS procedure on final:
G gas/fuel on
U undercarriage (tail wheel locked)
M mixture rich
