Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

No property. Prop, engine, nose gear, main gear, both wings, lower cowl and likely through undercarriage.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

The pilot was in the pattern for landing training. This was a second circuit. Configuration and airspeed satisfactory for all legs and considered wind gusts.

Aircraft was stable on final and landing was very smooth, but just as he touched down a gust of wind caused him to balloon. I ordered an immediate go around which he executed perfectly. He had accelerated to 85 knots in a slight climb. At around 25 feet the aircraft abruptly and rapidly pitched over to around 20 degrees nose low. Pilot said his hands never left yoke and I had immediately grabbed the yoke but got no response to my pull. Aircraft hit the runway with about 10 degrees nose low, nose wheel immediately broke and prop was destroyed. Main gear also collapsed. Aircraft slid off left side of runway 27 at KDKB and into grass where it spun around to heading of 090 and stopped. Position was opposite taxiway B2, south of the runway. All switches were turned off and we exited the aircraft. Pilot tried to lower flap handle (it wouldn't move, he said) to get out through right front door. Passenger exited through left rear door. We walked away from the aircraft to notice left wing severely damaged and bent up at steep angle. The right wing was badly wrinkled on aft lateral section.

Weather was clear, winds 290 at 14 knots with gusts reported up to 19 - 23. These are well within the aircraft limits and were evident throughout the day. Terrain around the airport is all flat. One prop tip was missing as was left nav light plastic cover. I checked runway for FOD and found none.

We noticed a small amount of fuel leaking from the left wing and had the airport fire truck (DeKalb Fire Department and parked at KDKB) dispatched; DeKalb Fire Department from city also responded. After an hour or so the trucks left.

The airport manager, Renee Riani, arrived and also checked the runway and surveyed the scene. She had the aircraft removed by around 2200 she said.

We didn't notice ELT, and although #2 radio had been set to 121.5, it may have been deselected at some point.

I feel with certainty that windshear caused our demise. I have had windshear training and I'm sure that with adequate altitude I might have been able to fly out of it.
