Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Front wheel broken off. Front strut bent. Tail broken. Aircraft flipped over. Prop destroyed. Cockpit glass broken.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Flying my personal aircraft solo, 2006 Flight Design CTSW N165CT, from KONZ to 69G on a pleasure flight, 5/23/23. Departed KONZ approx 9am. Arrived over 69G approx 40 minutes later. Circled the field at 2000' AGL to familiarize myself with the layout, field conditions, potential hazards, etc.

I monitored AWOS frequency for KOZW for wind and weather info. Wind was nearly calm and visibility unlimited. Entered a left hand pattern for runway 36 at 1000' AGL and made appropriate radio call. Turned base and final normally with appropriate call outs. Touched down on both main gears at appropriate speed with 40 degrees of flaps. Nose wheel touched down and wheel broke away, causing the strut to dig into the ground overturning the aircraft.

I extracted myself from the aircraft, determined that there was no immediate fire hazard, and proceeded to switch off all switches, ignition, and close the fuel shut off inside the cockpit. The Ballistic parachute system was also disarmed by replacing the safety pin.

I immediately notified the local police and the FAA via cell phone. Police summoned an EMS unit who proceeded to conduct an on site physical exam and determine that I suffered no injuries in the accident.

With the permission of the FAA, the aircraft was moved off the runway, with the assistance of several Sandhill Soaring club members who arrived on scene to assist.
