Narrative

On Monday May 29, 2023, at approximately 1:20 PM the Lyon County Sheriff's Office received a call about a plane that had crashed in a field near Larchwood Iowa. I was contacted at 2:21 PM to assist with scene measurements by the request of the Lyon County Sheriff's Office, NTSB and FAA.

When I arrived on scene there was a blue two seater airplane facing north on its right side. The wings were heavily damaged. There were gouge marks in the dirt to the west of the plane. First responders from Larchwood Fire drove though the large gouge mark where it appeared the front of the aircraft impacted the ground. I found a green lens cover from the right wing tip marker in the west most gouge mark in the field. I took pictures of the scene, final rest, and the gouge marks with my issued camera. I marked five Ground Control Points (GCPs) thought out the scene. I mapped those marks, final rest and the gouge marks with my GNSS. I took aerial photographs with my sUAS. I placed two PK nails at the base of an old windsock pole in the fence line to the southeast of the paved runway. The second nail was placed at the base of a railroad tie to the southeast of the paved runway. I made contact with Laura Abraham from the NTSB and she authorized the plane to be removed from the field. ACE towing removed the plane and it was placed in a hanger at the airport for secure storage.
