Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Tail rotor contacted ground. No other property damaged.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

On 5/31/23 at KPTK on the ramp, at approximately 1300 eastern time, while we were training for hover practice, during an exchange of controls, a gust of wind increased at that moment and moved the aircraft backward. I grabbed the cyclic with my hand and I attempted to save the aircraft from ground strike. The tail rotor stuck the ground and at that moment I immediately performed a hovering auto to avoid the countertorque spin. Afterwards a normal shutdown sequence was performed and we egressed the aircraft. No injuries were reported.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Be more vigilant on the flight controls especially during transfer of controls.
