Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Right main gear bent in and back towards the belly of the aircraft.
A 1/3 of the right outer wing bent.
Aileron attach brackets bent.
Boom hangars bent.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Preflight inspection was completed on the aircraft at 7:30 am. Weather was checked at 8:00 am through the on field local AWOS and was found to be satisfactory for the flight. Talked through with pilot the objective of the flight. Removed the aircraft from the hangar and started the aircraft to let the engine warm up. Pilot taxied to the runway and with the wind being calm takes off to the South away from the buildings at 8:15 am. Pilot climbed up to pattern altitude and flew North of Holyoke. The pilot entered the traffic pattern mid field for a left down wind for runway 32. Flew the down wind leg, turned for a left base, turned final, made his approach, made a real nice 3 point landing with 3 wheels rolling on at the same time. After landing, the airplane got away from the pilot veering to the left at about 1200 ft the aircraft went off the runway and ground looped in the grass around 8:45 am. I checked on pilot and he was fine with no injuries. The aircraft was sitting roughly 25 ft from the edge of the runway. I called the City of Holyoke to have a NOTAM put in place to close the runway to allow us to get the aircraft removed. Aircraft was retrieved and runway was cleared by 9:45-10:00 am.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

We feel as though we did everything we could to make this flight a successful one. A training syllabus was made weeks prior the flight. The pilot was educated on every aspect of possible scenarios.
