Description of Damage to Aircraft and Other Property <i>(Use additional sheet if necessary)</i> Broke two of the three blades of the prop, damaged lower front engine cowl, damaged top of vertical stabilizer, bent/ damaged both wing supports, bent lower fuselage on both sides.		
NARRATIVE HISTORY OF FLIGHT <i>(Please type or print in ink)</i> Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and and location, services obtained, and intended destination. Provide as much detail as possible.		
Preflighted, started, warmed up and performed checks per checklist, checks OK, taxied to runway 18 for takeoff, wind calm, normal takeoff, turned left to north heading and leveled at 500 feet above the ground, flew around Smithville Lake and went East about 10-12 miles then south, turned back north then west back to 29 Mo for landing. I lined up for a straight in approach to 18, did landing check, came in over the trees on the north end as usual, in the flare it seem to float in ground effect more than usual and I did not look as though we would touch down in the planned spot so I did a go around, I had to do that twice and on the last approach it looked good and I landed, as the aircraft was rolling out it seemed slightly fast but grass usually slows it pretty fast, but it appeared we would go on to the overrun slightly, that had happened once before, the overrun grass is not as dense as the runway and the ground is a little softer but I had been on it before and there was no problem, when the aircraft ran on to the overrun it was going approximately 20 MPH and suddenly went nose down and flipped on its back, we got out with minor injuries and no fire. The departure time was approximately 10:00 to 10:30 and landed at around 11:30, 29MO is a privately registered field with no services, I service the aircraft myself.
