Subject: CEN23LA261, Interview with airplane owner

Contact: Mr. Larry Caudill, airplane owner

I spoke with Mr. Caudill at his residence on September 6, 2023, regarding maintenance records for the airplane. Mr. Caudill reported that he purchased the airplane in 2008, and there were no maintenance records for the airplane. In 2009, he installed new fuel lines and fuel pump, rebuilt the carburetor, replaced the spark plugs, safety wires, brake lines, wheel innertubes, checked cylinder compression, drained the old fuel, and replaced the trim tab. There was no maintenance performed after 2009 other than the annual fuel filter replacement.
