NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State time and point of departure, intended destination, and services obtained.

Arrived at KHFY t 5:35pm on 7/12/2023 to prepare for a planned flight in the pattern to work on short and soft field takeoff and landings. Began the pre-flight inspection at 6:20pm and requested fuel to be topped off. Airport personnel fueled the aircraft and I check the fuel for purity. Performed the pre-flight checklist, start up checklist, and reviewed weather information from AWOS (wind 19 at 12kts, crosswind 2-3kts.) Performed a brake check before notifying Greenwood traffic of my intention to taxi Alpha to runway 19. Once I arrived at the run-up area, I performed the run-up checklist. The engine and flight controls all checked out. I proceeded to the hold short line of runway 19 and communicated via CTAF of my intentions to depart runway 19 and to stay in the pattern. Began rolling to the runway, holding back pressure, with 10 degree flaps, to perform a soft field takeoff and added power. There was a heavy left nose pull, which I attempted to correct with right rudder to stay on center. However, the left pull continued and I applied right brake to pull the nose to the right. Upon letting pressure off the brake the aircraft veered left (about 6 feet from the side of the runway). At that time I pulled power (a loud backfire was heard), retracted flaps, and attempted to slow the aircraft to a stop and avoid any obstacles in the field. I did my best to keep the front strut elevated to reduce potential damage. The aircraft continued to slow and came to rest in a ditch.
