Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

I departed a field from the west of the crash site, carrying a 20gal load of product to open the field. I made a counter-clockwise pass around the field, verbally noting "Powerlines on the west, powerlines on the south, building site on the west." Upon completing a low recon, I dropped into the field along the building site, and within 100' of application I saw powerlines against the sky about 20' before striking them. The aircraft hit a powerline strung across the field, and it slid up the windshield to the mast. I lowered collective, did a quick stop, and slowly lowered the aircraft into the corn field.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

A more thorough examination of the building site may have shown the power line, or stop and evaluate it better from the ground.

Attach extra sheets if needed. State departure time and and location, services obtained, and intended destination. Provide as much detail as possible.

I departed a field from the west of the crash site, carrying a 20gal load of product to open the field. I made a counter-clockwise pass around the field, verbally noting "Powerlines on the west, powerlines on the south, building site on the west." Upon completing a low recon, I dropped into the field along the building site, and within 100' of application I saw powerlines against the sky about 20' before striking them. The aircraft hit a powerline strung across the field, and it slid up the windshield to the mast. I lowered collective, did a quick stop, and slowly lowered the aircraft into the corn field.
